Company Corporate Governance_ Environmental and Biodiversity Policy

The following is based on the 2024 OECD, “Recommendation of the Council on Principles of Corporate Governance, OECD/LEGAL/0413”

Definitions are taken from the OECD (2017), “Methodology for Assessing the Implementation of the G20/OECD Principles of Corporate Governance,” OECD Publishing, Paris.

ENVIRONMENTAL AND BIODIVERSITY POLICY

Every human activity creates an impact on our environment. The understanding of how intrusive mining activities are to the environment motivated the founder of Current Focus Mining Corporation to achieve first academic place while attending the Faculty of Engineering of the University of Toronto. There, the founder excelled in mining engineering, environmental engineering and geochemistry among other subjects and formed his strong science fundamentals which coupled with his geo-mining-environmental work experience assures that both defining and minimizing the impact of mining activities on the environment are undertaken in every operation.

1. PURPOSE

To identify and minimize the impact on the natural environments where we operate.

To provide resources to address environmental risks during exploration, mining, construction, operations and closure.

To establish transparency of information such that our stakeholders are well informed about our environmental responsibilities and actions.

2. SCOPE

This policy applies to Current Focus Mining Corporation, its employees, subsidiaries, and service providers.

3. POLICY STATEMENTS

3.1. Environmental Care

Current Focus Mining Corporation promotes sustainable development by following industry standards, meeting environmental government obligations, monitor and improve

environmental performance as follows:

- i) Train and enforce this policy is followed by all employees,
- ii) Adapt ISO 14001:2015 as the environmental management system framework in accordance with the best industry practices to identify, monitor, and mitigate environmental impacts while meeting socio-economic objectives,
- iii) Establish emergency plans relevant to hazardous substances released to the environment,
- iv) Provide funding for operation closure activities such that the environment could recuperate its vitality.

3.2 Water

To achieve sustainability, Current Focus Mining Corporation will focus attention to the following:

- i) Define water sources, apply water conservation measures during operations,
- ii) Monitor operations water usage, and improve water efficiency usage,
- iii) Protect local water sources.

3.3 Tailings and Waste Management

- i) Apply the best international practices for storage, handling, disposal and closure of tailings and waste containment facilities.
- ii) Undertaking recycling processes through mine life

3.4 Climate Risk Management

- i) Apply energy consumption procedures and technology where feasible to contribute to the global “net zero” greenhouse gas emissions.
- ii) Involve our stakeholders in our decisions about gas emissions such that they can undertake their activities mindful of the need to reduce greenhouse gas emissions to our environment.

3.5 Community, Biodiversity and Land Use

- i) Respect Indigenous and local communities’ rights and involve them during the whole mining cycle with the view of working together to minimizing negative impacts of our

activities on their way of life and future prosperity.

- ii) Undertake science-engineering based decisions to ensure zero net loss of critical habitat and minimize negative impact to species.
- iii) Understand the biodiversity of our work areas prior, during and after closure as part of our legal requirements.
- iv) Operate only in areas designated for industrial/mining activities respecting and avoiding World Heritage Site
